

A thorough technical report and progress reports describing the BarelasGig working prototype in detail are being prepared and will be made available to the public on ABQgig's website and the linked GitHub. All of the mmwave components used in the demonstration are available for sale to the public. The final report will also be posted on the website and GitHub.

Also, a business plan has been requested by the Barelas Community Coalition. This business plan will be prepared in cooperation with the Coalition to define the costs and benefits from the having a fixed wireless gigabit network in the community. This business plan will also be available to the public, by request.
